Dy-Mark's Line Master Redefines Precision Line Marking

Dy-Mark is pleased to announce the launch of the Line Master, a new, redesigned line marking machine. After several months of research and development, the Line Master, capable of producing smooth, sharp lines, is giving a whole new meaning to precision line marking.

The new model features a modern, ergonomic design with a number of time saving characteristics. With a built-in Side Line Attachment, the centre handle can be removed and locked into the left or right hand side of the Line Master for marking lines close to walls or machinery. Alternatively, the handle can be completely removed from the machine, to function as a Spot Marking Handle.

Heavy duty construction ensures that the Line Master is tough and durable, but still lightweight enough for easy transportation. A handy utility tray also provides storage for up to 5 cans of Dy-Mark's Line Marking Paint for a quick and efficient refill.

The machine is designed for use with Dy-Mark Line Marking Paint or Turf Master. Line Marking Paint is a fast drying acrylic paint which provides long lasting lines in warehouses, car parks and more. Turf Master is designed for temporary grass marking applications such as landscaping or marking out sporting grounds. Both of these paints feature a safe, Toluene free formula.

During the machine's development process Dy-Mark asked its customers, some of whom mark lines on a daily basis, for their valuable feedback. By building on the current line marking machine, Dy-Mark developed the Line Master to provide greater functionality, efficiency and improved performance.

Along with the launch of the machine, Dy-Mark is also proud to introduce Hiro, the Line Master mascot. Hiro is a Japanese Samurai who represents precision and accuracy. His skills with the Samurai sword have inspired Dy-Mark in their pursuit of line marking excellence. Keep a look out for Hiro on our website and upcoming promotional material.

For more information, or to order the Line Master today, customers can contact Dy-Mark's Customer Service Department on 1300 396 275 or e-mail info@dymark.com.au.
