COVERAGE

COLORBOND®

FINISHES

MAINTENANCE

AND REPAIR

1. Before spraying, cover surrounding areas to protect from over-spray.
2. Shake can for at least 45 seconds AFTER the mixing ball begins to rattle. Shake the can occasionally during use.
3. Hold the can upright approximately 20-25cms from the surface. Spray with a smooth sweeping motion.
4. To prevent paint from sagging, apply up to 2-3 light mist coats rather than one heavy coat allowing 4-5 minutes between each coat.
